Subject: Recycled water and 306 Center Street

To the town government of La Conner,

My family and I traveled to Sacramento, CA recently and we noticed “Recycled Water” signs in cities along the I-5 corridor. My son looked it up for us and we found the recycled water is used for human consumption and agriculture, treated waste water into potable resuse. Our question is: Has our town government looked into this or have considered this in the past? Since we’re looking at becoming independent with power through solar someday that being more independent with water would benefit us.

Also, in response to the front page article in La Conner Weekly News about town council's decision towards 306 Center Street condos, we hope their decision favors the neighbors living around 306 Center Street. Troy and I realize that the Atkinson's in the past may have rights to continue forth with the project and felt objecting would hold no value to stopping it. And we also understood that the town council didn't have control of the situation at first. But thanks to Linda Talman's tenacity and research perhaps there is a chance to stop this monstrosity. We want to now say that if the attorney's advice (by the Town) is in favor of Talman's findings of the 1986 contract rezone agreement we wholeheartedly hope that the council's decision is for the agreement and appease to the surrounding neighbors.

Thank you for your time.

Sincerely,

LeAnn and Troy Bushey
