Solarize Skagit

Let the Sun In!

The Skagit Valley Clean Energy Cooperative (SVCEC) has formed a partnership with another non-profit, Olympia Community Solar, to create a solar group purchasing campaign. Olympia Community Solar has a proven track record with over 200 completed solar installations in the past two group purchasing campaign's they've organized.

If you're interested in exploring solar power for a home or small business, please sign up for a free assessment and consultation with the opportunity to lock in competitive group pricing for both solar installation with select local solar contractors.

This can be done on the website <https://olysol.org/solarize/> or by calling (360) 481-4020. Learn more about Skagit Valley Clean Energy Cooperative by visiting <https://www.skagitvce.coop/>.

If after the assessment you choose to participate, you simply purchase the installation directly with the solar contractor. You will have support through the whole process from idea to installation.
