Re: Snapdragon Flats

To Whom It May Concern:

This letter is sent regarding the proposed "Snapdragon Flats" permit application. As someone who lived through and endured this property owner's rock removal for his "Snapdragon Hill" development, I strongly encourage the town and administrative officials to properly review this permit applicant's compliance with the permits received as a result of the Snapdragon Hill development before considering any new permit applications.

This property owner is not a good neighbor, nor does he show concern about the currently existing residents of La Conner. Approval of any permits without a first review and serious scrutinizing of his site preparation in conjunction with the approved permits and other aspects of the Snapdragon Hill project is strongly discouraged.

As an aside, perhaps it would be advisable for the Town of La Conner to institute a moratorium on further development approvals until the impact of the currently approved projects can be ascertained concerning infrastructure, traffic congestion, safety, walkability, noise, quality of life, etc.

Thank you for your kind attention to this matter.

Sincerely,

Linda Clark
